All Rights Reserved**

Publications may be printed for single use only. Additional electronic or hardcopy distribution without the express permission of ALTA Metallurgical Services is strictly prohibited.

Publications may not be reproduced in whole or in part without the express written permission of ALTA Metallurgical Services.

The content of conference papers and presentations are the sole responsibility of the authors

	Page
<p>Keynote Presentation: Recent Growth of Nickel Laterite Processing in Indonesia Taufiq Hidayat, Researcher, Metallurgy Engineering Research Group, Institut Teknologi Bandung, Indonesia</p>	1
<p>Nickel Laterites—Grade Definition and Process Optimisation by Mineralogical Monitoring Using X-Ray Diffraction XRD Uwe König, Global Mining Segment Manager, Malvern Panalytical, The Netherlands</p>	19
<p>The Atlas Materials Process for Low-Carbon Nickel David Dreisinger, Co-Founder & President, Atlas Materials, Canada</p>	34
<p>Sulfuric Acid Plant Integration in Nickel Hydrometallurgical Facilities Matthew King, Manager, Business Development, Worley Chemetics, Australia</p>	51
<p>HPAL Autoclave Performance: A Comprehensive Design Exploration Wolfgang Keller, Vice President Research & Development, EKATO, Germany</p>	62
<p>Autoclave Overpressure: The Hidden Variable Rob Mock, Director of Research & Development, Nova Hydromet, Canada</p>	74
<p>Long-Term Experiences and New Developments in Autoclave Linings for High-Pressure Leaching and Pressure Oxidation Processes Daniel Kessler, Managing Director, DSB Säurebau, Germany</p>	83
<p>DetaPipe Changing Reactive Metal Pipe Systems for HPAL and POX Operations Edgar Vidal, Vice President Marketing & Business Development, NobelClad, USA</p>	95
<p>Implementation of Selective Oxidation at Lihir Gold Operations Papua New Guinea John O'Callaghan, Consultant, Australia</p>	107
<p>Proposed Bacterial Heap Leaching of Ore Sorter Products at Anax Metals' Innovative Whim Creek Project Tony Parry, Senior Consultant, Nexus Bonum, Australia</p>	131
<p>Solution Rate Techniques for Copper Ore Column Leaching Testing Fernando Zeballos, Director of Metallurgical Projects, Compañía de Minas Buenaventura, Peru</p>	144
<p>Modelling Copper Leaching in Heap Systems Considering Competing Reaction Mechanisms and Coupled Dissolution with Reprecipitation (Cdr) Processes Eric O. Ansah, Researcher, University of Melbourne, Australia</p>	153
<p>Integration of Hydrometallurgy Process and Mineral Carbonation Technology Yasunori Nozoe, Engineering Manager, JGC Corporation, Japan</p>	171

	Page
<p>Breaking Free of the New Mine Development Catch-22 Matt Schneider, CTO, Idoba, Australia</p>	186
<p>Techno Economic Evaluation of The Atlas Materials Process Mike Dry, Owner, Arithmetek, Canada</p>	192
<p>Innovative Technologies for Extraction of Nickel, Cobalt, and Manganese from Laterite Crusts Maxim Seredkin, Technical Director, ERM Sustainable Mining Services, Australia</p>	203
<p>Evaluation of Carbonate and Phosphate-Based Biocement for in situ Barrier Operations Pelin Polat, Researcher, Curtin University, Australia</p>	219
<p>Clays Contained in Mineral Ores and Their Effects on Solid-Liquid Separation Processes Andrew Hawkey, Diemme Filtration, Australia</p>	234
<p>Microwave Processing of Ores — Commercial Realisation of a Step Change for the Minerals Industry David Craig, Vice President, Jenike & Johanson Inc., USA</p>	244
<p>Beyond Limits: Titanium Nitride's Game Changing Role in Hydrometallurgical Production Evelyn Ng, Group Manager, Materials & Innovation, Callidus Process Solutions, Australia</p>	257
<p>More Out of Tailings: Metal and Acid Production, Circularity and Energy Transition Darryl Harris, Head of Global Project Solutions Asia Pacific, Metso, Australia</p>	268
<p>Diluent Selection and Its Impact on Performance Jia Tian Lee, Fluids CAD Technical Professional, ExxonMobil Chemical Asia Pacific, Singapore</p>	280
<p>Benefits of GTL G80 Mining Diluent in Copper SX for Low- and High-Grade Copper Ore Miguel Rivera Torrente, TS&D Specialist, Shell Global Solutions International, The Netherlands</p>	289
<p>Investigating the Impact of High Temperature Agitation Leaching on the Rate of Oxime Degradation Andrew Nisbett, Global Project Manager, BASF Mining Solutions, USA</p>	302
<p>Mass Transfer Intensification Implementing the Use of Static Mixers in Co/Ni Solvent Extraction Derik Van Der Westhuizen, Research Scientist, North-West University, South Africa</p>	310
<p>Production of Battery-Grade Nickel and Cobalt Sulfate from Nickel Laterite Ore Kaixi Jiang, Chief Scientist, BGRIMM Technology Group, China</p>	344

	Page
<p>Halion Process: Breakthrough in Halide Leaching Dave Sammut, Founder & Managing Director, Loop Hydrometallurgy, Australia</p>	360
<p>A New Vortex Erosion Test Methodology for Evaluating Erosion Resistance Bon Nguyen, Research Engineer, CSIRO Mineral Resources, Australia</p>	369
<p>Modularization of HPAL and POX Units in Nickel & Cobalt Industries Peng Si, CTO, Morimatsu Energies & Materials, China</p>	377
<p>Extending Autoclave Service Life Beyond the Third Decade Evelyn Ng, Group Manager, Materials & Innovation, Callidus Process Solutions, Australia</p>	394
<p>Modelling and Simulation of Nickel Solution Purification in Industrial Jarosite Autoclaves Johann Steyl, Director, Dynamet Insights, South Africa</p>	407
<p>Enhancing Nickel Laterite Processing Using Electrochemical Separation to Extract Sulfuric Acid from Magnesium Sulfate Solutions Mohamed Ibrahim, Researcher, University of Queensland, Australia</p>	418
<p>Technology Selection and Flow Sheet Optimisation for Nickel and Cobalt Sulfate Crystallisation Plants Nipen Shah, Head of Sales, JordProxa, Australia</p>	425
<p>The Use of Ion Exchange Resins to Produce High-Purity Cobalt and Nickel Sulfate Johanna van Deventer, Technical Sales Manager, Puralite, South Africa</p>	439
<p>Development in Battery Metals Solvent Extraction Process Design and Simulation Hannu Laitala, Chief Metallurgist, Hydrometallurgy, Metso Outotec, Finland</p>	442
<p>Impurity Removal Piloting for The TECH Project – Manganese, Zinc and Calcium Removal, Gypsum Management, and Transformation and Purification SX for Production of High Purity Cobalt Sulfate Boyd Willis, Chief Metallurgist, Hydromet Consulting, Australia</p>	456
<p>Selective Co-Extraction of Ni & Co from High-Ca/Mg Solutions Shengxi Wu, Lecturer, Central South University, China</p>	507
